**Series V**

**Series V**  
Radio Remote Controls  
Designed for Overhead Cranes

**Driving The Future**

- AC Variable Frequency Drives
- Engineered Systems
- Filter Products
- Master Switches
- Pendant Stations
- Radio / Wireless Remotes
- Variable Frequency Drive Accessories

The Series V transmitter allows the control of all overhead cranes. With indestructible operating elements and an extremely robust housing, the transmitter can withstand even the toughest conditions over many years. Thanks to its ergonomic neck or hip strap, the Series V is always at hand but never in the way!

### Details at a glance:

- 2 joysticks with up to 5 steps or analog
- Diverse one-step push buttons
- Diverse rotary/toggle switches
- STOP impact switch
- LED for indication of operation/battery status
