

Crane and Hoist Variable Speed Drive Retrofit Kits

Drivecon's variable speed drive technology allows users of overhead cranes the benefit of upgrading their cranes to present day technology. Drivecon supplies all required electrical control equipment and drawings. If you operate or maintain cranes with troublesome speed controls Drivecon can design an upgrade package for you. Engineered specifically for your crane, Drivecon's control upgrade package offers the most effective method to upgrade your old crane to "better than new condition". Drivecon has provided and designed retrofit drive systems for just about all makes of overhead cranes. Some cranes operating with Drivecon inverters date back to pre 1930's running original motors! No matter what the age, Drivecon has the knowledge and hardware to improve operation and safety, which adds to your bottom line. All you need do is call your crane professional for installation assistance. Drivecon is always available for free customer support to all our customers. Just call 800-374-8266 for assistance or a quick quote.
